PAARTH KAPUR

Seattle, WA | +1 (206) 226-2763 | paarthkapur@gmail.com | linkedin.com/in/paarth-kapur| Portfolio: paarthkapur.github.io

EDUCATION

M.S. in Data Science | University of Washington – Seattle, WA | 2026–2028

B.Tech. in Information Technology, Honors in Artificial Intelligence | K. J. Somaiya College of Engineering – Mumbai | 2020–2024

SKILLS

Programming & Data: Python, R, SQL, Pandas, NumPy, NoSQL, Relational Databases

BI & Visualization: Power BI, Tableau, Sigma, DOMO, Advanced Excel

Data Engineering: Snowflake, PostgreSQL, Airflow, DBT, SAP, Tableau Prep Builder, Predictive Analytics

Automation: Power Automate, Selenium, Python Automation, Spoon (Pentaho), Outsystems

AI & Analytics: Machine Learning, Deep Learning, NLP, LLM APIs, Prompt Engineering, Statistical Modeling, Computer Vision, Generative AI, RAGs

WORK EXPERIENCE

Business Analyst | Tata Play Pvt Ltd – Mumbai | Sep 2024 – Aug 2026

- Led development and execution of the profitability model using SQL scripts, PostgreSQL databases, and Spoon (Pentaho) workflows to drive business insights.
- Designed and delivered business-critical reports, like a Tableau report to identify dealers exhibiting suspicious patterns and potential fake activations, supporting revenue assurance and dealer-level investigation.
- Automated monthly reporting, reducing time and effort by 75%; implemented high-volume data-entry automation using Python and Selenium, cutting processing time by 50%.
- Applied NLP classification to customer reviews to identify complaint sentiment and issue types, enabling analysis of recurring customer issues and actionable insights.

Data Analyst Intern | Colgate Global Business Solutions – Mumbai | Jan 2024 – Jun 2024

- Leveraged Snowflake SQL to optimize APAC processes across Inventory, Sales, Stock Management, and Forecasting.
- Validated KPIs, reconciled cross-system data, investigated discrepancies, and managed monthly refresh cycles for reliable supply-chain reporting.
- Designed a Snowflake-powered Stock Availability Report integrating supply-demand logic, safety stock thresholds, lead times, and country-specific calculations.
- Built a low-code Outsystems prototype connecting SAP to an external webpage and supported testing through test scripts, test data, and automation issue resolution.

Programmer Analyst Intern | Mobicule Technologies Netrascan – Mumbai | Jun 2023 – Jul 2023

- Developed a Python + Flask application using CNN models to detect and mask sensitive information in images across varied orientations and built Python scripts for data pipelining, cleaning, and automation, reducing manual processing effort .

PROJECTS

DAX Query Generator: Natural Language to DAX with LLMs | 2026

- Built an LLM-powered tool that converts plain-English business questions into DAX measures for Power BI, using schema-aware prompting over tables, relationships, and existing measures.
- Added embedding-based retrieval of similar question-DAX examples (RAG) to ground the model's output in the semantic model's conventions.
